

AE-1M

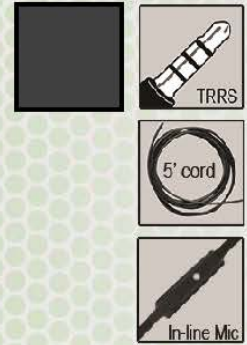

The Only Single Use Earphone Worth Listening To

The AE-1M is the best solution available on the market for the single use earphone category. Not only does it offer superior sound quality but the AE-1M also features a very sensitive microphone for use during testing and recording sessions.

Designed with Children in Mind

Children's ears are particularly sensitive to loud sound. Additionally, no two children's ears are the same size. The AE-1M is designed to fit over the ear canal as opposed to within it like more standard silicone tipped earphones. This ensures that the AE-1M fits a wide variety of ear shapes while preventing children from placing earbuds too deeply within the ear canal thereby damaging their hearing.

This product complies with CPSIA and TPCH regulations.
