Introducing WorkeZ

Each joint is measured in 15° increments. Joints lock in place every 15°.

To operate a joint, depress the button and rotate the leg to the desired angle

Once the button is depressed, joints rotate in a complete circle or 360°.

The joint is locked when the button is extended. Only use WorkeZ when all joints are locked.

Depress the button to adjust the leg.

An extended button means the joint is locked.

When adjusting be wary of your fingers
