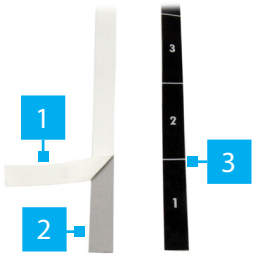
Quick-Start Guide

Rack Unit Labels | 2 Strips Included

Product Diagram (RKUNITAPE)



Port		Function
1	Removable Backing	• Remove backing to expose the Adhesive Surface.
2	Adhesive Surface	• Used to secure the Unit Lable in place on the rack. ***Note:*** *The unit labels are easy to apply and, if necessary, you can reuse them.*
3	U-marking	• Used to indicate U space. ***Note:*** *Each unit labels is 52 rack units long, but you can cut them to fit properly in your server rack.*

Requirements

- Server rack
- Isopropyl alcohol
- Scissors (if you need to cut the label)

Installation

Preparing the Rack Surface

The surface that you apply the unit labels to must be dry and free of contaminants. Otherwise, the adhesive won't stick to the surface.

1. To clean the surface, use isopropyl alcohol or a similar substance to remove any dirt or contaminants.
2. Dry the surface thoroughly.

Applying the Unit Label

The unit label has some stretch and flex to it. Make sure that you line up the label with the corresponding rack units as you apply the label.

1. If necessary, use scissors to cut the unit label to fit the server rack that you're using.

   Note: *Make sure that you cut the unit label along the U markings on the label.*
2. Peel off a small section of the removable backing from the label.
3. Place the exposed adhesive surface on the server rack, making sure to line up the U markings on the label with the server rack units.
4. Apply firm and continuous pressure to the unit label and rack as you peel off the removable backing.

Removing the Unit Label

1. Remove the unit label from the server rack, grab one end of the label and carefully pull it off of the rack.
2. Clean the surface, use isopropyl alcohol or a similar substance to remove any dirt or contaminants.
3. If necessary, reapply the unit label to another server rack.

What is a U?

- Server racks are classified by U size and depth. U is the standard unit of measurement used to designate the vertical usable space of a server rack, or the height of racks and cabinets. 1U is equal to 1.74 in. For example, if a rack is designated as 20U, it has 20 rack spaces for equipment and has 35 in. (20 times 1.75) of vertical usable space.

  Note: *The Unit Lable includes two unit labels that are each 52 rack units long.*
