

# Metal Containers - Utility/Monotop

## DESCRIPTION

**Black Swan Metal Containers - Utility/Monotop** are silver monotop containers. Each container comes with a screw on cap. Caps have dauber attached. Both the cans and lids are made from a tin-plated material. The containers are offered in ¼ pint, ½ pint, pint, and quart sizes each with a 1-3/4" can opening. They are ideal for a variety of uses including solvents, adhesives, rubber cements and viscous materials.

This dauber is commonly used as an applicator for applying cement and primer to plastic pipe and fittings. Many people purchase cement and primer in larger size containers - gallons or 55 gallon drums - and then pour the cement and primer into smaller containers. In this way there is less waste of material and the material cost goes down because of the larger volume purchases.
