Installation:

1. Unscrew existing showerhead by turning it counterclockwise. If necessary, use an adjustable wrench.
2. Confirm the washer filter (a rubber black donut with filter) is in the shower ball.
3. Thread the shower ball connection onto the shower arm, and tighten clockwise by hand.

NOTE: Be careful not to overtighten or cross thread to avoid damaging the connections.

CAUTION: Risk of Personal Injury! If the water temperature is set too high, scalding will occur. The water temperature should never be set above 120°F (49°C). Do not use this Brondell low-flow product with a shower valve that allows the water temperature to become too hot.
