## CSP1 - PROFESSIONAL

### OUR PRODUCTS ARE DESIGNED TO INCREASE PRODUCTIVITY AND MAXIMIZE COST SAVINGS

The Cloudstatic CSP1, is the most versatile & effective electrostatic cart sprayer on the market and is designed to increase productivity and maximize cost savings. Our Realstatic Technology™ maximizes consistent surface coverage while minimizing chemical waste. The ergonomics of our Cloudgun™ and the mobility of our Cloudcase™ eliminates the need for multiple variations of sprayers to effectively service facilities. By adding the ability to plug in or run off rechargeable batteries for power, substantially reduces downtime and our High/Low Flow Control Switch allows precise application so you can cover more square footage in less time with less chemical waste.

### A PROFESSIONAL-GRADE SPRAY SYSTEM

- + DUAL POWER
- + HIGH/LOW FLOW CONTROL SWITCH
- + REMOVABLE TANK
- + ERGONOMIC AND COMPACT
- + LIGHTWEIGHT TO REDUCE FATIGUE
- + REINFORCED METAL FRAME CONSTRUCTION

### cloudgun™

Featuring *realstatic technology™*

- + Patent pending nozzle design
- + Best-in-class electrostatic performance
- + Lightweight, ergonomic anti-fatigue
- + High/low flow control switch
- + Quick-release connectors

### cloudcase™

- + Dual power - AC/DC
- + Rapid change batteries
- + Easily-removable & refillable tank
- + Quick-release hose connectors
- + Strong metal frame construction

DIMENSIONS 25in H x 21.6in L x 12in W

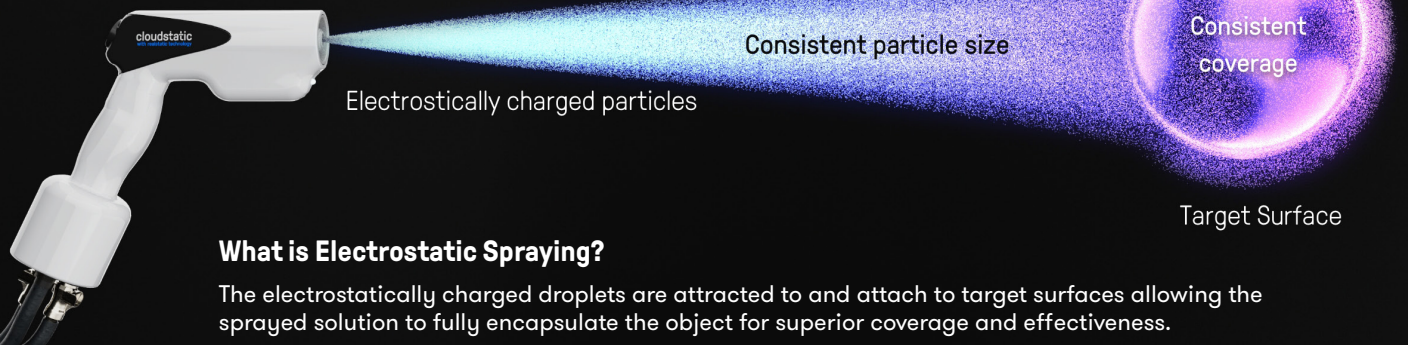

**PATENT PENDING**

## realstatic technology™

Engineered to provide the perfect balance of electrostatic charge, flow rate & spray pattern to maximize surface coverage & consistency while minimizing waste. Our system is internally grounded so the electrostatic charge to the spray droplets is consistent and effective in attaching to the target surfaces.

**Cloudgun™** uses an innovative *patent pending* nozzle and power technology to provide consistent atomization of the solution and is energized with a strong electrostatic charge.

### What is Electrostatic Spraying?

The electrostatically charged droplets are attracted to and attach to target surfaces allowing the sprayed solution to fully encapsulate the object for superior coverage and effectiveness.

### INDUSTRIES

- + Healthcare
- + Education
- + Hospitality
- + Transportation
- + Facility Management
- + Safety-Emergency Response

### APPLICATIONS

- + Surface coating
- + Disinfection
- + Decontamination
- + Degreasing
- + Pest control
- + Preventative Maintenance

Compatible with most water-soluble commercial chemicals, disinfectants, pesticides, and fungicides. User to follow chemical SDS data sheet and product label instructions.
