Product Information

The NEW LoPro series Wireless Solar-powered marker cab light system is revolutionary to the marketplace and gives you sharp and bright LED Cab lights on your vehicle, but with no drilling, no holes, no wiring, and no problems! Eliminate water leakage, corrosion on your roof, and major issues with wired kits. Stop paying installation centers 4+ hours of labor (Typically over \$750+ in labor and materials) to install other cheap aftermarket cab light systems that requires holes, wiring, and are nothing but long term problems waiting to arise. The patented technology allows any professional shop to install in less than an hour on any roof, and ensures no drilling, no holes, no wires, and no problems! The wireless cab light kit is easy to install, and after the first initial power on, takes care of the rest using light and vibration sensors to control the light. When the vehicle is moving, the sensor picks up the light vibration and turns the lights on so as it is dark out. Within 1 minut
