### Product Information

The NEW V2 DemonEye® LED kit is brighter, longer lasting, and slimmer than our original version 1 kit. The entire kit was made slim and sleek with an ultra thin element circuit board with Philips Zes diode technology. The same diodes we use on our famous DRIVE, Terminator and GEN4® LED kits that have a reputation to be bright, high performing, and long lasting. The RGB accent diode was also changed and gives off a brighter and crisper accent color when turned on. Enjoy the same dual functionality as the version 1, but experience a longer lasting durability, a brighter diode output, and easier fitment on more vehicles. Not to mention DemonEye is a trademarked name owned by Race Sport Lighting, so don't be fooled by imitators, and the technology used is officially license from the patent holder and our licensed rights our transferred to all of our resellers. So when you sell this product, you can sleep comfortably at night knowing you are getting the best quality product on the marke
