Product Information

The HydroBLAST™ series has adaptable lighting pieces available in solid or multi-color versions that are compatible with your choice of either an RF (MSUWRCC12V) or Bluetooth APP (MSUWBTC12V) controller. These versatile controllers can power the underwater pods and deck lights, but also an additional run of Marine Sport led strip lighting, at the same time! Which means you can control your entire LED lighting system with one remote!

Also, keep in mind, the Bluetooth controller option conveniently allows you to change the colors and patterns of your HydroBLAST™ lighting system via your smartphone. The app features a color wheel, presets, and will even store your favorite custom colors and patterns. Which means you can finally accompany that great playlist with a deserving light show.

The HydroBLAST™ Series Includes HydroBLAST™ LED deck lights. These compact, simple to install accent LEDs shine light right where you need it, thanks to an integrated directional shade!

Perfect for accenting your cabin's floor, walkways, stairways, closets, and inside cabinets. Use under railings and handrail for a unique look.

Part Type ID	57174	Est. Labor	1.00
Gross Weight	0.100	Width	3.500
Net Weight	0.100	Height	2.250
