

MEASURING INSTRUCTIONS

MEASURING INSTRUCTIONS FOR WIDTH: Find the NARROWEST width opening that your shelf will go through. REMEMBER to take into consideration obstacles such as hinges and cabinet doors. Once you have that number: SUBTRACT 1in. That final number is the WIDEST Rolling Shelf you should order. As an EXAMPLE: Your NARROWEST width measurement is 23 in., the WIDEST Rolling Shelf you should order is: 22 in.

MEASURING INSTRUCTIONS FOR DEPTH: Measure from the front of your cabinet to the back of your cabinets interior wall. That depth is normally 20-24 in. Order the shelf size that will fit into that depth. Remember that each cabinet opening can be different, so measure the depth and width of each individual shelf.
