

Product Description

D-A Blue Flame A[™] is an ashless industrial gas engine oil engineered for use in two and four cycle light/medium gas engines. It is recommended for applications where an ashless oil is required for best performance. D-A Blue Flame A resists oxidation and nitration at high operating temperatures thus allowing extended oil life with fewer engine deposits and reduced operational cost. It burns completely to keep gas engine combustion chambers free of deposits that can lead to spark plug fouling and pre-ignition. A high concentration of dispersant additives minimizes piston ring belt, skirt and undercrown deposits while also preventing formation of sludge that can plug oil passages and shorten oil filter life.

D-A Blue Flame A is formulated with thermally stable, high VI base oils that are naturally resistant to oxidation. These base oils are combined with extremely effective ashless dispersant engine cleaners, antiwear additives for superior control of engine wear and a special inhibitor combination to control oil oxidation and nitration.

Product Features and Benefits

- High level of ashless dispersants keeps critical engine parts cleaner and working at maximum efficiency.
- Ashless to minimize harmful deposits, which can cause pre-ignition, spark plug fouling and valve failures.
- A balanced blend of chemical inhibitors controls oil oxidation and nitration processes for reduced oil thickening and longer oil life.
- Effective suspension of oil contaminants by dispersant additives to limit oil filter plugging for longer oil filter life.

PRODUCT AT A GLANCE

- Ashless Engine Oil
- Light/Medium Service Gas Engine Oil
- For Use in 2 and 4 Cycle
- Burns Completely
- Fewer Engine Deposits
