

## Modular Divider Wall System

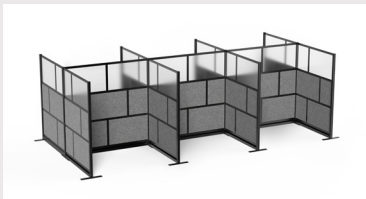

Luxor's Modular Wall System is a flexible, easy-to-assemble, and economical solution for transforming any space into a thriving work environment.

More than just privacy partitions, each wall features a functional, curated panel pack that limits visual distractions, dampens sound, and fosters collaboration - so you can get the most out of your workspace. These innovative panels effortlessly rearrange for a custom look that best fits your space.

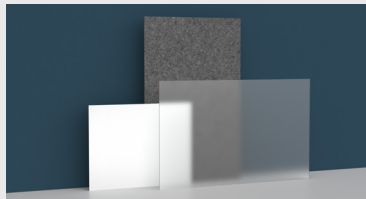

### Adaptable

Luxor Modular Walls are scalable and expandable, empowering you to configure - and reconfigure - your wall system to accommodate your ever-changing workspace.

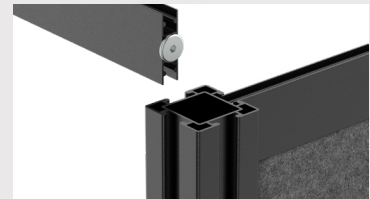

### Purposeful

Featuring a mix of arrangeable frosted acrylic, sound-absorbent, and whiteboard inner panels, each wall can be optimized for privacy, natural light transmission, ideation, and productivity.

### Simple

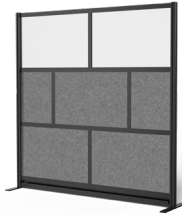

Quick and easy to set-up, the Modular Walls feature innovative slide-in frames that instantly connect together without the need for professional installation.

## Getting Started with Your Modular Wall System

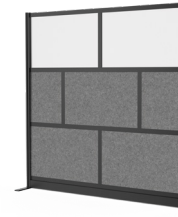

### Step 1: Choosing Your Starter Wall

A Starter Wall is the cornerstone of every Modular Wall System. It features a metal foot and frame at both ends, making it freestanding. You can use a Starter Wall as a standalone divider or connect Add-On Walls to it to expand your system.

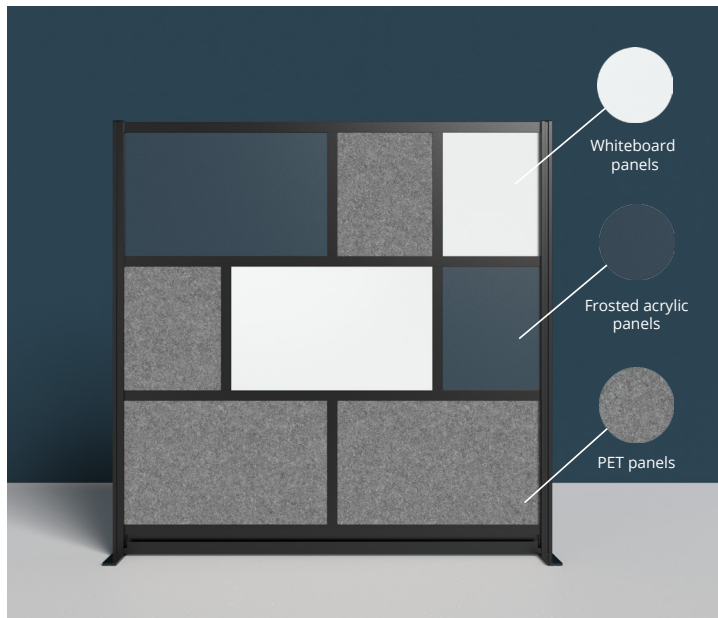

### Step 2: Connecting Your Add-On Walls

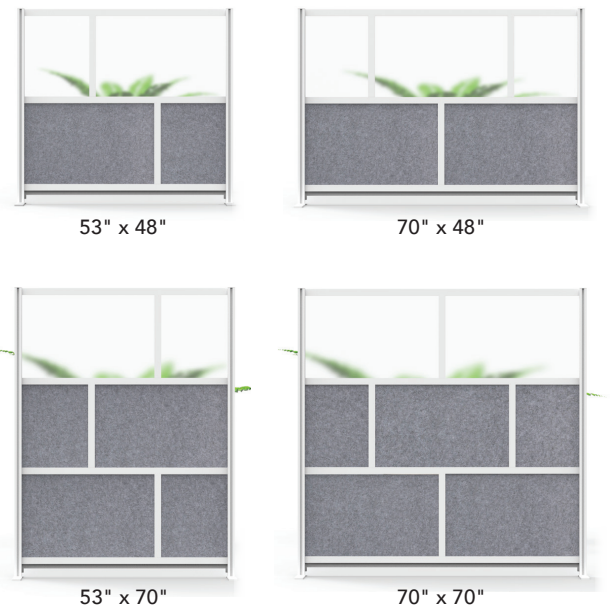

An Add-On Wall is open at one end, allowing it to connect to a Starter Wall or other Add-On Walls. You can connect infinite Add-On Walls together - in straight lines or at 90° angles - to configure cubicles, meeting spaces, and more.

## Functional Paneling

## Variety of Sizes and Styles

Modular Walls come in a choice of two frame colors - black and brushed aluminum - to best complement the look of your space.
