

All Purpose Absorbent

DESCRIPTION

Black Swan's All Purpose Absorbent are granules made up of highly absorbent non-flammable minerals. They absorb liquids including most types of oils, mixtures of soluble oils and water, acids, paint, ink and water. They reduce hazards and slipping accidents, prevent flash oil fires on floors and keep them clean and dry.

DIRECTIONS

1. Spread absorbent over area to be cleaned thickly enough to cover and absorb liquid, or until there are no visible puddles.
2. Allow granules to absorb spill.
3. Sweep up granules with stiff brush.
4. For areas that regularly have spills, spread absorbent down in advance. This will prevent difficult-to-remove accumulations from developing.

CAUTION

Contact with turpentine, vegetable oil, unsaturated organic compounds, and hydrofluoric acid may generate heat and/or fire. Do not use with these compounds.

This product contains naturally occurring crystalline silica as quartz. Exposure to dust may cause eye and respiratory irritations. Using eye protection and respirators are recommended.
