### Specifically Designed to Be Installed on Collaborative Robots

Our Cobot Kits have been pre-engineered to come complete with the correct diameter and quantity of REIKU metal bands or velcro straps combined with the necessary 17, 23, 29 or 36 mm REIKU clamps, jaws and conduit.

The **Velcro Strap** kit is recommended for Cobots that operate at slow to average speeds with moderate conduit loads when filled with cables/hoses.

The **Metal Band** is recommended for Cobots that operate at higher than average speeds or are equipped with heavier conduit loads when filled with cables/hoses.
