To our valued customers,

California's Safe Drinking Water and Toxic Enforcement Act of 1986, better known as Proposition 65, requires warnings to consumers of potential exposure to chemicals in products. This proposition has been recently amended with changes to the "Clear and Reasonable" Warning regulation effective August 30, 2018.

KYOCERA SGS Precision Tools (KSPT) is committed to proposition 65 compliance as required by a manufacturer. KSPT Safety Data Sheets (SDS) have been updated to include the new Safe Harbor "Clear and Reasonable" Warning for occupational exposures. Additionally, KSPT has integrated the compliant warning statement into its product labels. All products manufactured on or after August 30<sup>th</sup>, 2018 will be shipped with the new, updated labels.

The Prop 65 standard specifies two forms of warnings. Where signage is required, a pdf file containing the following warning is available and can be printed at your convenience at [www.p65warnings.ca.gov](http://www.p65warnings.ca.gov).

**WARNING:** This product can expose you to chemicals including Cobalt, which is known to the State of California to cause cancer. For more information go to [www.p65warnings.ca.gov](http://www.p65warnings.ca.gov)

Product labels will contain the information shown below:

**WARNING:** Cancer - [www.p65warnings.ca.gov](http://www.p65warnings.ca.gov)

KSPT has worked to make this transition to the new State of California requirements as smooth as possible. Please look for the new warnings on products and in literature starting August 30, 2018.

Regards,

KYOCERA SGS Precision Tools
