

HYDAC High Pressure Ball Valves

Ball Valve Locking Devices

Description

In situations where the opening or closing of a ball valve can cause severe damage or personal injury, HYDAC recommends the installation of a locking device. Locking devices are available for our entire range of high pressure ball valves. Two different styles are available to accommodate the different valve body styles. All HYDAC high pressure ball valves can be ordered with a locking device. Locking devices can also be ordered separately using the chart below.

Material note: All lock plates and lock bars are made of Zinc plated Steel.
