## INTRODUCTION

Antaira Technologies' LMP-C602G-SFP-bt-V2 series is a 6-port industrial compact Gigabit PoE++ managed Ethernet switch embedded with 4\*10/100/1000Tx Ethernet ports that support IEEE 802.3bt for a maximum of 90W/port and 2\*100/1000Fx dual rate SFP slots for fiber connection. The LMP-C602G-SFP-bt-V2 is a fully manageable light layer 3 Ethernet switch that is pre-loaded with a user-friendly web management console design. It supports the ring network redundancy function using the market's open standard ITU-T G.8032 Ethernet Ring Protection Switch (ERPS) protocol that has a <50ms network recovery time. The advanced network filtering and security functions, such as IGMP, VLAN, QoS, SNMP, RMON, Modbus TCP, and 802.1X/HTTPS/SSH/SSL increase determinism and improve network management for remote SCADA systems or control networks.

The LMP-C602G-SFP-bt-V2 series is IP40 rated and DIN-rail mountable. There are also two wide operating temperature models for either a standard temperature range (STD: -10°C to 65°C) or an extended temperature range (EOT: -40°C to 75°C). It also provides high EFT and ESD protection for industrial networking applications, such as power/utility, water wastewater, oil/gas/mining, factory automation, security surveillance, ITS and any other outdoor or harsh environment. With a compact form and all connections facing the front of the Ethernet switch making it easy viewing of installations in a reserved space.
