

# SOLAR POWERED

## Scallop Lamp

Use for Paths or Walls

Model #: 48505

2-Pack

## ASSEMBLY & OPERATING INSTRUCTIONS

**IMPORTANT: READ ALL INSTRUCTIONS CAREFULLY BEFORE USE**

### ABOUT YOUR SOLAR POWERED SCALLOP LAMP

Your MAXSA Solar Powered Scallop Lamp Lights convert sunlight into electricity during the day, enabling the 4 LED lights to turn on automatically at night. These Scallop Lamp Lights are perfect for using to light paths or mount to walls. They provide illumination and help reduce falls and tripping. They are solar powered. The included rechargeable battery is powered each day by the sun to allow the Scallop Lamp Lights to illuminate your paths or walls at night.

Your Solar Powered Scallop Lamp Lights can stay lit for up to 8 hours when the battery are fully charged by 8 hours of sunlight. The included sealed rechargeable 3.2V 300 mAh AA Lithium-ion battery should last for at least 2 years before it needs to be replaced.

### INCLUDED PARTS:

1. Two Scallop Lamp Lights with Integrated Solar Panels
2. Two Poles and Stakes for Ground Mounting
3. Two Adapters for Wall Mounting
4. Mounting Adapter
5. Mounting Rings
6. Mounting Hardware (Screws)

## CHOOSING A LOCATION

Your MAXSA Solar Powered Scallop Lamp Lights are designed for using on paths and walls. Your Solar Powered Scallop Lamp Lights come complete with built-in solar panels and rechargeable batteries. For optimum sun exposure and longer light output, place the Solar Powered Scallop Lamp Lights where they receive 6-8 hours of direct sunlight per day. Placing the lights in a shaded location keeps the batteries from charging fully and reduces the number of hours the lights operate each evening.

Each Solar Powered Scallop Lamp Light is equipped with a light-sensitive trigger to automatically turn the light on at dusk. For best performance, ensure that the Lamp is not placed near nighttime light sources such as porch lighting and street lighting. To initially activate the light, pull the tab attached to the battery. Your light will automatically activate when it gets dark enough.

## HOW TO INSTALL ON PATH

1. Add ring to mounting adapter
2. Push ball into opening at bottom of light
3. Tighten the ring to hold light straight
4. Insert poles and stakes into mounting adapter
5. Insert in ground

## HOW TO INSTALL ON WALL

1. Add ring to mounting adapter
2. Push ball into opening at the bottom of the light
3. Tighten ring adapter to hold light at desired angle
4. Insert curved wall piece into mounting adapter
5. Mount to wall using enclosed hardware

## OPERATING YOUR SOLAR LAMP LIGHTS

The Lamp Lights turn on automatically when it becomes dark.

After you pull out the battery tab, if you want to test the light, you can cover the solar panel with your hand or paper and see if the light turns on.

## REPLACING THE BATTERY

The included 3.2V AA Lithium-ion battery should last for at least 2 years. Only replace the battery with similar style AA Lithium-ion rechargeable battery.

1. Carefully twist off the solar cap counterclockwise from the base.
2. Remove the battery compartment cover by unscrewing the 3 screws.
3. Carefully remove the battery.
4. Replace the battery with a new 3.2V 300 mAh AA Lithium-ion rechargeable battery.
5. Replace the battery compartment cover.
6. Replace the solar cap onto its base.

**Caution:** Dispose of Lithium-ion batteries properly. Never dispose of them in a fire.

## MAINTENANCE

The LED lights in your Solar Lamp Lights will last up to 30,000 hours and should never need replacement.

Keep your Solar Lamp Lights looking new by wiping them occasionally with a dry cloth or with warm soapy water. Dirty solar panels prevent the batteries from charging well, shorten the life of the batteries, and may cause the lights to malfunction.

## TROUBLESHOOTING

<p>Light will not switch on.</p>	<ul style="list-style-type: none"><li>• Ensure that the battery has been fully charged in direct sunlight for a full sunny day. Artificial light will not charge the battery. Your light must charge in sunlight.</li><li>• Check to see that the solar panel receives 6-8 hours of sunlight per day to allow the battery to charge fully.</li><li>• Check to see that the Solar Scallop Lamp light is not near nighttime light sources such as streetlights or porch lights.</li><li>• Check and make sure the battery tab (under the cap) is pulled out and battery is in correct polarity and snugly.</li><li>• Check the outside temperature. The light may not work well when temperatures are well below freezing. It will work when temperatures warm up.</li></ul>
<p>Light turns on during the daytime</p>	<p>The photosensor may be covered or in shadow. Be sure nothing covers the Solar Lamp Light so the photosensor can determine the proper time to turn the light on.</p>
<p>Light is not as bright as normal</p>	<p>Battery charge may be low. Check to make sure the solar panel is not covered and that the light is receiving 8 hours of sunlight. Give it a full sunny day to recharge.</p>

# ONE YEAR LIMITED WARRANTY

1 YEAR LIMITED WARRANTY: MAXSA Innovations, LLC warrants to the original consumer/purchaser that this product shall be free of defects in material and workmanship under normal use and circumstances for a period of one (1) year from the date of original purchase for use. When the original consumer/purchaser returns the product pre-paid (consumer pays return shipping) to MAXSA Innovations, LLC, 8412 Cathedral Forest Dr; Fairfax Station, VA 22039; USA within the warranty period, and if the product is defective, MAXSA Innovations, LLC will at its option repair or replace such. This warranty shall constitute the sole liability of MAXSA Innovations, LLC concerning the product. MAXSA Innovations, LLC expressly disclaims all other warranties INCLUDING, WITHOUT LIMITATION, THE WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. NO PERSON, FIRM, OR CORPORATION IS AUTHORIZED TO ASSUME FOR MAXSA Innovations, LLC ANY OTHER LIABILITY IN CONNECTION WITH THE SALE AND USE OF THE PRODUCT.
