Overview

Key Features

The Uvex 880 Series Klip Lifts for hard hat visors offer fast and convenient vision enhancement for a wide range of industries. Whether you work in steelmaking, welding and cutting facilities, foundries or glassmaking operations, you will appreciate the convenience of the flip-up feature. These lenses can be quickly flipped down for observing a melt or a weld, and flipped back up again when not needed. Movement through a full 180° arc is possible, allowing the filter lenses to be raised or moved completely out of your line of vision.

- Fit onto hard hat or bump cap brims • Worn in conjunction with existing protective eyewear
- Quickly flip down to enhance vision, then flip up when not needed
- Integral spring clip holds 880 Series securely — without screws, fasteners or tools
- Available with half or full lenses in green welding shades 4, 5, 6, 8; cobalt blue shades 3, 4, 6, 8; and green glare reducing shade 3
