

PIG® Battery Acid Neutralizing Absorbent Mat Pad

MAT2300 Mediumweight, 12" W x 11" L, 25 pads per box

Absorb and trap lead acid battery spills, safely neutralize them with color-change confirmation and clean them up easily, all in one step with this battery acid mat pad.

- Neutralize battery acid spills as you soak them up with these mediumweight absorbent mat pads.
- Store near battery charging stations or anywhere you keep lead acid batteries.
- Mat pad continues to change colors until spill is completely neutralized and safe for handling; color guide included within Guidelines for PIG Acid Encapsulating and Neutralizing Absorbents document under Resources and Downloads.
- Additive in mat pad turns liquid battery acid into an easier-to-clean encapsulating gel trapped inside the mat.
