

PIG® Water-Activated Flood Bag

WTR009 Ideal For Stacking, Retaining Walls, 12" W x 24" L x 3.5" H When Fully Saturated, 10 per bag

Super absorbent flat bags swell up on contact with water to become a solid, heavy barrier to quickly dam and divert floodwater.

- Stack 26"-long sandbag replacements to create a retaining wall in flood-prone areas when water is coming
- Lightweight, compact and easy to handle before activated, unlike standard sandbags which are heavy, messy and labor-intensive
- Stack and stagger up to three rows high; build even higher retaining walls by using a pyramid layout
- NOTE: Not for use with salt water

Specifications

Dimensions	15" W x 26" L x .25" H
Brand	PIG
Capacity	4 gal. per Bag
Dimensions When Fully Saturated	12" W x 24" L x 3.5" H When Fully Saturated
Height When Fully Saturated	3.5" When Fully Saturated
Ideal For	Stacking, Retaining Walls
Color	Black
Install/Deploy Type	Temporary/Removable Barrier
Temperature Limit	Works from 32°F to 180°F
Traffic	Non-Weight Bearing
Weight When Fully Saturated	32 lbs. each When Fully Saturated
Sold as	10 per bag
Weight	4.7 lbs.
Composition	Skin: Polypropylene Filler: Super Absorbent Polymer (SAP)
UNSPSC	24101907
Pigalog® Page Number	Page 261

Metric Equivalent

Weight	2.1 kg
Dimensions	38cm W x 66cm L x 6.4mm H
