

## PIG® Water-Activated Flood Bag

WTR010 Ideal For Stacking, Retaining Walls, 12" W x 24" L x 3.5" H When Fully Saturated, 36 per bag

Super absorbent flat bags swell on contact with water to form a solid, heavy barrier to quickly dam and divert floodwater.

- Sandbag alternatives are lightweight, compact and easy to handle prior to activation; place in flood-prone areas when you know water is coming
- Sandless solution eliminates the mess, heavy lifting and manual labor of filling standard bags with 40 lbs. of sand
- Stack and stagger sandbag replacements up to three rows high; build even higher retaining walls by using a pyramid layout
- NOTE: Not for use with salt water
