Exam Room Flags High Visibility Neon Colors (New)

Omnimed neon room flag systems are made of durable powder coated aluminum and hold 1-4 flags per unit. These non-electrical units are quiet to operate and can rotate 180 degrees. This flag system comes with 8 or 4 inch flags that can be inverted to reverse their color order. Signals can be attached next to the door of any room or office to let others know what the current status of that room is at just a glance. Clinics and hospitals have been using a color code systems for many decades so many staff members are aware of the color coding system.

Features:

- Durable powder coated aluminum
- Quiet non-electrical movement
- 4 Highly visible colors
- 180 degree rotation
- Invert flags to reverse color order
