CONSTRUCTION

The luminaire features matte white finish and galvanized housing. Wall mounting accessories are available for easy installation, and multiple knock-outs provide options for motion sensor.

OPTICAL SYSTEM

Luminaire is built with the highest quality driver that is Universal Voltage (120V-277V), uses long lasting, high-efficient LED package.

LENS

Frosted lens diffuser reduces glare and improves overall light output.

SENSOR READY

Pre-installed motion sensor.

ENERGY SAVINGS

Over 50% energy savings than traditionally fluorescent fixtures, low heat productions requires less maintenance and operation cost.

LISTING

UL Listed, DLC Premium Listed

WARRANTY

5 year Limited Warranty, Rated for 50,000 hours.
See Warranty documentation for details.

WATTAGE	DELIVERED LUMENS	EFFICACY
35W/45W/55W	7095 @ 3500K	129 lm/W

Based on the highest wattage @ 3500K default setting, 80 CRI. Actual lumens may vary.

TECHNICAL SPECIFICATION

CCT	3500K/4000K/5000K
CRI	82
DIMMABLE	0-10V Continuous Dimming (10%-100%)
BEAM ANGLE	120°
VOLTAGE	120V-277V
POWER FREQUENCY	50/60 Hz
POWER FACTOR	>0.9
THD	≤10%
WORKING TEMPERATURE	-40°F ~ 122°F
STORAGE TEMPERATURE	-40°F ~ 158°F
IP RATING	Suitable for damp locations
WARRANTY	5 year limited

Pre-installed Motion Sensor Configuration

SENSOR OPERATION

Upon initial power up, the sensor will turn on to 100% and then dim to OFF after 20 seconds. After that, it will run based on the programmed time delay and dim level.

During standard operation, the sensor will turn on to 100% when motion is triggered. It will then dim the light to the level set by the dip switches after the time delay (set by TIME DELAY DIAL) expires. The light will remain at this dim level indefinitely until motion is triggered again (light will not turn off).

TEST MODE

Pressing the test button puts the sensor in test mode. Test mode sets the time delay to 5 seconds and runs for 5 minutes. The red motion LED will flash twice to indicate that test mode has started. After either 5 minutes has elapsed or the test button is pushed again, the red motion LED will flash three times to indicate the sensor is returning to normal operation based on the programmed time delay and dim level.
