

Child-Resistant – Safety First Bags

- **Child-resistant, two-handed locking mechanism and secured zipper to prevent children from opening (Meets ASTM D3475-15 standards)**
- **Heavy 6mil thickness**
- **Compliant for food contact**
- **“Smell-proof”**

Our Child Resistant Bags can be used for any product that should be kept away from children: detergent pods, marijuana or any substance that may be dangerous to children can be stored in these bags.

The bags include a closure zipper that requires two hands to open. The zipper can be manipulated by adults easily but it will be difficult for children to access. The bags meet ASTM D3475 (American Society for Testing and Material Child Resistant) standards.

To open, push the small lever up, then pull the zipper out to access items. To close, push the zipper lock until you hear a "click" from the bottom lever. These extra steps are easy for adults to follow but make it difficult for children to access what's inside.

Options Available:

Stock Number	Description	Pieces/Case	Weight (lbs)
