

Wide Seal – Ideal for Plastic Tubes

- Impulse Sealing – No Warm Up Time Needed
- Wide Meshed Seal Width (10mm / .39")
- Timer for Variable Sealing Materials
- Can Seal Plastic Tubes (Prior Testing Required)

More Details:

PFS-200B is an impulse sealer with a 10mm meshed seal. This sealer can seal material up to 20 mil or more in total thickness.

Impulse hand sealers seal poly bags any thermoplastic materials quickly and efficiently without a warm-up time. The PFS-200B sealer is equipped with a plug-in electronic timer to control the sealing time needed for different material thicknesses. Once the timer is set, the sealer will provide a consistent seal. We recommend the

operator hold the seal bar down for a few seconds after the light goes out to ensure that the seal has enough time to cool and set.

For sealing tubes, we have found the PFS-200B to be a great value priced option for small and sample productions. **Always send us a sample first to determine if the PFS-200B will be an appropriate choice.**

Features:

	PFS-200B
Type	Impulse Sealing
Voltage	110V
Power	1000W
Seal Length	8"
Seal Width	10mm
Seal Type	Meshed
Weight	14-lbs
