Sentinel Mark II® Diverter Trim and Handicap Shower System (Valve not included)

FEATURES:

- CPT-3401:   Diverter Shower Valve Trim
- S-2500:   Shower Arm and Flange
- VS-100-PC: 2.5 gpm (9.5 L/min) hand Held Shower with Pause/Trickle Button
- VS-153-ADA: 24 in. ADA Slide Bar
- 60 in. Metal Stainless Steel Hose

VALVE OPTIONS:

- CPV-PB-DV: Pressure Balance Diverter Valve Sweat & Thread Connections
- CPV-PB-DV-PXC: Pressure Balance Diverter Valve PEX F1807 Crimp Inlet Connections
- CPV-PB-DV-PXE: Pressure Balance Diverter Valve PEX F1960 Cold-Expansion Inlet Connections
- CPV-T2-DV: Thermostatic Diverter Valve Sweat & Thread Connections
- CPV-T2-DV-PXC: Thermostatic Diverter Valve PEX F1807 Crimp Inlet Connections
- CPV-T2-DV-PXE: Thermostatic Diverter Valve PEX F1960 Cold-Expansion Inlet Connections

STOCK FINISHES:

PC

STANDARDS:

- ASME A112.18.1/CSA B125.1 certified
- ADA compliant

⚠ IMPORTANT ⚠

- Be sure to read instructions thoroughly before beginning installation.
- Be sure to have properly adjusted the Temperature Limiting Stop (TLS) as outlined in the Valve Installation Manual.
- Cover your drain to prevent loss of parts. Be sure to wear eye protection while cutting pipe.

MAINTENANCE

Your new Valve Trim is designed for years of trouble-free performance. Keep it looking new by cleaning it periodically with a soft cloth. The use of harsh chemicals and abrasives on any of the Speakman custom finish products may damage the finish and void the product warranty. Please be sure to only use approved cleaners. Please contact Speakman for any clarification of acceptable cleaners.

WARRANTY

Warranty information can be found at:
www.speakman.com

1 **OPTIONAL:** If a firm fit is required, insert the O-Ring ❶ onto the Bonnet ❷ of the Shower Valve.
**2** Verify that the Valve is in the "OFF" position. Install the Wall Plate ❶ to the Valve. If installing a Diverter model of Trim, align the Diverter Handle to the 12 o'clock position and position the Diverter Drive Tube ❷ over the Diverter Spindle of the Valve. Secure with the included Mounting Screws ❸.
3 Align the Index Plate ❶ with the Large Slot ❷ and Small Slot ❸ on the Wall Plate. If installing onto a Diverter Model, align the U shape ❹ under the Diverter Handle and then align to the slots.

SPEAKMAN

### SAFETY TIPS

Cover your drain to prevent loss of parts.

MAINTENANCE

Your new Shower Arm is designed for years of trouble-free performance. Keep it looking new by cleaning it periodically with a soft cloth. Avoid abrasive cleaners, steel wool and harsh chemicals as these will dull the finish and void your warranty.
WARRANTY

Additional warranty information can be found at:
www.speakman.com

1 Place the Escutcheon Plate (1) on a flat surface. Push the long end of the Shower Arm (2) down into the plate. This will help the teeth of the plate slide over the arm easier.
2 Once the Escutcheon Plate (1) is on the shower arm, slide the plate over the Shower Arm (2).

3 Apply Teflon Tape to inlet side of Shower Arm (2). Thread Shower Arm (2) into Female Pipe Fitting within the wall. Firmly tighten, and make sure Shower Arm (2) Outlet is pointing in a downward position.

4 Position Escutcheon Plate (1) flat against wall.

SPEAKMAN®

VS-2954, VS-1001-ADA-PC
Installation, Maintenance & Operation Instructions
ADA / HANDICAP SHOWER AND BAR

DESCRIPTION
Speakman ADA handicap shower system includes hand held shower (VS-100-PC), 5' stainless steel hose with built in vacuum breaker, shower arm bracket, and 24" grab/ slide bar assembly (VS-153-ADA). Connects to standard shower arm. Shower arm flange (10-0219-PC-P) and 8" shower arm (42-0029-PC) for VS-2954 model only. Chrome handheld shower puts out 2.5 GPM/9.46 LPM to meet ANSI A112.18.1 Standard. ADA Compliant.

SPECIFICATIONS
INLET SUPPLY:
        (VS-1001-ADA-PC) ½" NPT FEMALE
        (VS-2954) ½" NPT MALE
FLOW RATE: 2.5 GPM/9.46 LPM, MAX., HAND HELD VARIABLE
SHIPPING WEIGHT:
        (VS-1001-ADA-PC) 4.5 LBS.
        (VS-2954) 4.9 LBS.

INSTALLATION
For VS-2954 model only. Slip the wall flange onto the shower arm. Apply thread seal tape clockwise onto the male threads and screw arm into supply piping behind wall. Wrench tighten. Slip wall flange to wall. Check for leaks.
Remove (turn counterclockwise) your existing showerhead from the shower arm. Clean the shower arm threads of any debris and wrap thread seal tape in the clockwise direction around threads. Assemble shower arm bracket to the shower arm. Hand tighten firmly. Assemble the 5' hose to the bottom of the shower arm bracket. Hand tighten firmly. Then attach the other end of the hose to the hand held shower. Make sure the hose to hand held connection seals on the O-ring at the bottom of the hand held to prevent leaks. When installing the bar, the location is optional but limited to the length of the hose. For installation of the grab/ slide bar, hold the bar against the wall in the chosen location. Using a pencil, mark the drill hole positions (4 in total) for the lower and upper mounting brackets. If using as a grab bar, be sure to fasten securely to a wall stud. (Note: upper mounting bracket height is adjustable) To mount the brackets, use a No. 10 (0.1935 inches/5.5mm) masonry drill bit to make a hole approximately 1-3/8 inches (35 mm) deep. Push the plastic anchors (4 in total) into the drilled holes, unless your mounting to wall studs, where anchors can be omitted. (Note: plastic anchors may not be suitable for all types of wall construction, seek professional help if in doubt) Fix upper mounting bracket and then the lower mounting bracket to the wall using four (4) screws provided. Push the bracket covers over the mounting brackets while paying close attention to cover orientation for proper placement.

OPERATION
To operate the handheld shower, push the pause button to one side to bring the flow down to a trickle, then simply push it to the other side to turn the flow back on full force.

MAINTENANCE
The finish of your SPEAKMAN VERSATILE® hand held shower and all the other components can be cleaned by using mild soap and warm water. Dry immediately with a soft, clean cloth for best results. The flow control device limits water flow to 2.5 gallons per minute, and is in the base of the handheld. The small orifice in the flow regulator, resulting in lower flow and a weaker performance, may become clogged. To clean the flow regulator, simply remove the hose from the hand shower and clean as necessary.

TOOLS AND SUPPLIES

Thread Seal
Tape
(included)

⚠ IMPORTANT ⚠

Be sure to read instructions thoroughly before beginning installation. Do not overtighten any connections or damage may occur. This hand shower has an optimal operating range of 20-80 psi.

SAFETY TIPS

Cover your drain to prevent loss of parts.

MAINTENANCE

Periodic cleaning using a mild soap and warm water will help keep your Hand Shower's appearance in its original condition.

For best results, dry immediately with a soft, clean cloth. <u>DO NOT USE</u> harsh and/or abrasive cleaners.

On CHROME PLATED HAND SHOWERS, a two (2) part white vinegar, one (1) part water solution can be used to break down excessive mineral deposits on the sprays. Let the hand shower soak in the solution for about ½ hour then rinse thoroughly. Brush off any remaining mineral deposits if necessary.
<u>DO NOT USE</u> the vinegar/water treatment on any finish other than Chrome.

WARRANTY

Additional warranty information can be found at: www.speakman.com

**1** Connect the correct side of your hose (not included) to the water supply. Hand tighten.

2 Connect remaining end of Hose to inlet of Hand Shower. Hand tighten. If there are leaks at the hose connections, look into using thicker washers to ensure a tight seal.
3 To pause the flow of water, press the integral thumb operated pause/trickle button located on the side of the hand shower. To return the hand held shower to full flow, press the shuttle button from the opposite side.

⚠ IMPORTANT ⚠

- Meets the ANSI standard 250 lbs. pull-test for grab bars and ADA lever handle for adjusting slide bar.
- The VS-153-ADA Slide Bar meets ADA pull force requirements only. It is not intended to replace an ADA Grab Bar.
- Do not over-tighten any connections or damage may occur.
- Be sure to read instructions thoroughly before beginning installation.

SAFETY TIPS

- Cover your drain to prevent loss of parts. Be sure to follow all tool manufacturers safety guidelines.
- Use caution when drilling into walls to avoid electrical and plumbing lines hidden within the wall.

MAINTENANCE

Your new Speakman Product is designed for years of trouble-free performance. Keep it looking new by cleaning it periodically with a soft cloth. The use of harsh chemicals and abrasives on any of the Speakman custom finish products may damage the finish and void the product warranty. Please be sure to only use approved cleaners. Please contact Speakman for any clarification of acceptable cleaners.
WARRANTY

Additional warranty information can be found at: www.speakman.com

---

1 Remove Decorative Cover Plate from Upper Mounting Bracket. Slide Lower Decorative Cover Plate up and over Lower Mounting Bracket as shown below.

---
2 Position the Upper Mounting Bracket over the Slide Bar. Ensure the mounting location is within the usable range of the hand shower hose.

---

3 Hold the Slide Bar against the wall in the chosen location. Adjust the Upper Mounting Bracket height location. Using a pencil, mark the Drill Hole positions (x4) for the Upper and Lower Mounting Brackets. Ensure the Slide Bar is level vertically.

NOTE: If using as a Grab Bar, be sure to fasten securely to proper bracing within the wall.

NOTE: Upper mounting hole is intentionally off center to allow for easier installation.

X4

---

4 **If mounting directly to wood stud or a wood stud behind drywall, proceed to Step 6.** If mounting to tile or masonry wall, Drill holes (x4) in the marked locations using a No. 10 (0.1935 inches/5.5 mm) masonry drill bit to make a hole approximately 1 3/8 inches (35 mm) deep.

Ø No.10/5.5mm

X4

---
5 Push the Plastic Anchors (x4) into the drilled holes. Ensure the plastic anchors are flush with the wall. (Note: Plastic Anchors provided may not be suitable for all types of wall construction, seek professional help if in doubt).

X4

---
6 Remove Upper Mounting Bracket from Slide Bar. Secure Upper Mounting Bracket in place using the Mounting Screws provided (1) with a Phillips Screwdriver. Reinstall the Decorative Cover Plate (2) to the Upper Mounting Bracket.

1

2
7 Position the Slide Bar flush against the mounting surface and push the Slide Bar through the hole in the Upper Mounting Bracket.
8 Secure the Lower Mounting Bracket (1) in place to the wall using the Mounting Screws provided with a Phillips Screwdriver. Reinstall the Lower Decorative Cover Plate (2) to the Lower Mounting Bracket.

NOTE: Upper mounting hole is intentionally off center to allow for easier installation.
9 Orient the Hand Held Shower Bracket to your desired position. Adjustments are made by rotating the Locking Handle 1/4 turn counter-clockwise to release the position, and 1/4 turn clockwise to lock into the desired position.
