

ArtiLink500B

Link OBD And Battery Testing

The ArtiLink500B is TOPDON's newest all-in-one tool that works as an OBDII code reader and a battery tester. This product includes complete OBDII functionalities, able to read and erase codes, view freeze frame data, identify the vehicle's information, and more. With this tool, you can check a vehicle's carbon emission with ease and quickly identify problems in a vehicle's computers. Offering expanded capabilities, the AL500B can accurately measure the battery's actual cold start current capacity, state of health, and more. With this device, you can get complete reports on the starting and charging systems for even more convenient car maintenance services.

Features

- Full OBDII Capabilities
- Battery Tests
- Cranking Tests
- Charging Tests
- System Tests
- Data Playback Function
- Print Function

Specs

Display: 2.8" color screen
 Operating Voltage: @DC 9V~30V
 OBD II diagnostic cable length: 1.3m
 Battery test line length: 1.8m
 Working Environment: -10°C to 50°C
 Storage Environment: -20°C to 70°C
 Product Dimensions: 185.93* 95*34.03mm
 Product Weight: 272.16g
