

BT20

Your First Battery Tester

The BT20 is TOPDON's latest entry-level wireless 12V battery tester. Equipped with a full range of features, this tool is suitable for the most common 12V lead-acid battery types. Taking the BT series to a higher level, it offers high-precision voltage detection and real-time voltage monitoring. This easy-to-use device lets any user, regardless of skill level, view voltage waveform graphs and test reports through an app. Its load test method provides accurate results, making the BT20 a battery tester with superb cost-effectiveness.

Features

- Suitable for 12V Lead-Acid Batteries.
- Supports a 5-20V Test Range.
- Simple Convenient Bluetooth Connection.
- Intuitive and Easy-to-use App with Guided Operations.
- Displays the Voltage Waveform Graphs in its App.
- Includes High-Precision Voltage Detection.
- Offers Real-Time Voltage Monitoring.
- Full Functionality Includes Battery, Charging, and Cranking Tests.
- Displays Battery Life, Charge & Discharge Status, and More.
- Highly Accurate Load Testing Method.
- Displays Battery Life, Charge & Discharge Status, and More.
- Data Playback Function.
- Generates Reports for Easy Sharing and Troubleshooting.
- LCD High-Resolution Screen.
- Backlit Buttons for Simple Operation Even in The Dark.

What's in the Box

- BT20
- Battery Clamps
- User Manual

Specs

- Battery Type: 12V Lead-acid battery
- Clamp Cable Length: 0.4m (15.75")
- Voltage Test Range: 5-20V
