

DUPONT™ TYVEK® GARMENTS NOW PACKAGED FOR PPE VENDING MACHINES

Industrial Protection garments made of Tyvek® that your employees rely on to help perform their tasks at hand are now available in a convenient vend pack for Personal Protective Equipment (PPE) vending machines in the industrial workplace. Simply choose **Option Code PI**.

You may already have a PPE vending machine on-site, or have plans to install one. These machines are a growing trend—similar to machines that you would use to buy a can of soda, PPE vending machines can dispense garments, masks, goggles, gloves, and other PPE items. The machines can be coded to deliver appropriate protective garments—that you determine—to the employee requesting them, so that every employee receives a suitable garment for their job.

Same great garments, added convenience

Garments made of Tyvek® packaged for PPE vending machines in industrial workplaces and not for retail sale offer an ideal balance of protection, durability, and comfort that you have come to expect from Tyvek®, now packaged for easier distribution at your facility.

Garments made of Tyvek® are composed of flashspun high density polyethylene that creates a unique, nonwoven fabric available only from DuPont. Tyvek® fabric offers an inherent barrier to small-sized particles built right into the fabric itself; there are no films or laminates to abrade or wear away.

The comfort fit design is based on extensive wearer input to provide our most comfortable garment design, helping to enable a greater range of movement while stretching and bending.
