

# Commercial Segment

(Hospitality, Resorts and Convention)

## 1. Lobby/Offices

The lobby and entrance to a hotel has many requirements for wire and cable. Access control cables at the entrance, phone and computer network cables at the front desk and in the business center, as well as security and video are just a few of the many examples found in the lobby.

### 4. Restaurant/Room Service

Many hotels and resorts can have multiple restaurants, bars and buffets. These areas can pose enormous challenges on wire and cable products used for ventilation, temperature controls and temporary power. General Cable products are designed and built to meet and exceed the daily challenges of the food preparation and service setting.
