Forged Tough For Forcible Entry.

Halligan-Style Forcible Entry Tool

The One-Piece Steel Halligan That's Drop-Forged For Maximum Strength, Made In U.S.A.

Council's forcible-entry tool is the strongest professional-grade Halligan you can buy. That's because it's a one-piece tool, drop-forged from the toughest alloy steel. This multipurpose tool is designed for effective prying, striking and punching through obstacles. It is perfect for breaking windows, ventilating roofs and forcing doors open. The Halligan's working ends are heat-treated for extra strength and wear resistance. Both the fork end and the pry/horn end are designed for ideal leverage during forcible entry applications.

Council Tool's Halligan is also designed with two forged-in holes to allow the use of straps or rope. The strap holes are part of the one-piece, forged construction, so they won't loosen or break off.
