

RUST REFORMER® AEROSOLS V2100 SYSTEM

A revolutionary way to stop existing and future corrosion in one step.

- Dries fast — 12 minutes to touch
- Dries to a hard, flat black finish that can be topcoated with oil or latex coatings
- Protects against corrosion better than other rust converters on the market
- Can be used on surfaces that reach 200°F

RUST REFORMER® AEROSOL

V2100 SYSTEM

High Performance Rust Reformer® Aerosol

Less Prep Time • Apply directly to rusted metal

Less Application Time • Minimal prep required

Less Downtime • Dries 12 minutes to touch

Greater Lifetime Value • Longtime protection against future corrosion

Typical applications

For minimal surface prep projects such as: Equipment • Railings • Complex Shapes
Metal Furniture • Seams • and other hard to reach places

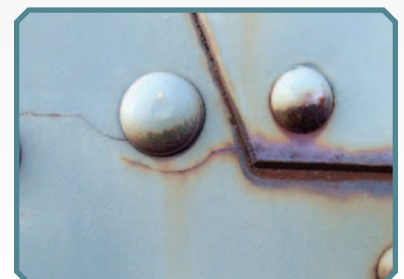

Outperforms alkyd primers and other rust converters on the market.

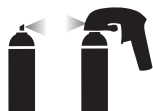

Rust-Oleum® Rust Reformer® vs Enamel Primers
Direct-to-rusted metal and exposed to salt spray for 310 hours

Rust-Oleum® Rust Reformer® vs Loctite® Extend®
Bare rusted steel panels coated with rust converter and exposed to salt spray for less than a week
