

CAN LINER COMPARISON

Can liners not only come in a variety of sizes and colors, but also in the materials they are made of. The main types of can liners that Grainger offers are listed below along with their benefits. When you compare them side to side, it makes it much easier to see what types of trash each is particularly suited for.

Linear Low Density Liners

Resilient liners that incorporate strength and stretch into a sound product that performs in a range of situations. Available in a variety of strengths, colors and sizes.

- Highly puncture and tear resistant
- Excellent overall film strength
- Top quality resins
- Clear and white liners are made from materials that are USDA and FDA approved for food storage

Super Hexene HAO Liners

(available in coreless rolls and individually folded)

This product line, which employs the use of top-notch resin, delivers our toughest can liners. Super Hexene HAO liners offer maximum film strength with impressive puncture and tear resistance. When faced with heavy duty jobs that require an exceptional liner, you can count on these.

- Premium Can Liners
- Remarkably sturdy
- Maximum Film Strength
- Ideal for heavy duty and industrial
- Extraordinary puncture and tear resistance

Post Consumer Waste Liners

Our Post Consumer Waste liners utilize recycled resin and offer a more environmentally responsible option. It's an incredibly strong liner that can handle a variety of waste, in a variety of situations.

- Manufactured from top quality post consumer and internally recycled resin
- Contains up to 70% recycled content and 10% postconsumer resin
- Reasonably priced alternative to non-recycled liners
- Environmentally responsible
- Amount of PCW meets minimum recommended by EPA making it eligible for LEED Credit

High Density Can Liners

From lightweight refuse to wet, smelly refuse, High Density Can Liners deliver. These liners are not for trash that may have sharp or jagged edged, but they still provide a quality product that does a great job.

- Practical choice for office trash
- Excellent odor and moisture barrier
- Performs well under temperature extremes
- High dart impact and tensile strength
- Clear liners are made from materials that are USDA and FDA approved for food storage
