

7 STEPS FOR WORKPLACE SAFETY

1. FORM A SAFETY TEAM

Appoint a diverse group of employees to devise safety plans and regularly discuss opportunities for improvement.

2. IMPLEMENT A PLAN

Partner with local authorities on how to keep your employees safe during different types of emergencies including fires, earthquakes, and storms.

3. TRAIN, TRAIN, TRAIN

Hold frequent safety meetings and safety drills for your employees to learn and practice important safety protocols.

4. HOLD INSPECTIONS

Regularly inspect safety equipment, workfloor conditions, and air quality for chemical exposure in accordance with OSHA's regulations.

5. USE VISUAL CUES

Remind your employees of safety hazards with posters, digital signs, color codes, labels, and more.

6. PROVIDE PPE

Ensure employees have access to the safety equipment required for their application. Regularly inspect PPE for damage and replace it as necessary.

7. MAKE CONTINUOUS IMPROVEMENTS

As your business evolves, so do your safety needs. Consistently fine-tune your safety strategy to prevent injury and foster well-being on the job.
