

# TYPES OF LIGHTING IN THE WORKPLACE

## LED BULBS

- Last 20+ years
- Most energy efficient
- Available in a variety of colors

## FLUORESCENT TUBES

- Last up to 20,000 hrs.
- Energy efficient
- Cost less than LED

## EMERGENCY LIGHTS

- Provide backup lighting in a power outage
- Illuminate hallways, stairways, and exits
- Required by law in businesses

## WORK LIGHTS

- Provide temporary light to dark workspaces
- Portable and versatile
- Lights can be mounted or handheld

## TASK LIGHTS

- Provide increased, direct light for specific tasks
- Task lights can include desk lamps, workbench lights, wall-mounted lights, under-cabinet lighting, and pendants
